

Flight Gear Hangar Caddy Simplified Instructions

Stand the bag upright with the Flight Gear logo toward you. Once you have located the logo, notice the grey fabric strip above it. If you look at the left side of it you will notice there is a Velcro flap. If you open the flap, you can see that there is a fabric "sleeve". This is made for one of your supports. Hold the support in your hand with the beveled side toward you. Insert the support as shown below. Now, turn the bag around and insert the other support as you did on the other side.

You will notice that on the inside of your bag there are two metal squares hanging from a black strap on both ends of the bag. Start by opening the Velcro on your handle. Insert the Velcro flap on the handle through the bottom end of the metal attachment. Pull the flap through and snap it together. Do the same thing on the other end of the bag.

Now that your Hangar Caddy is assembled, it is ready for use.
